EMERGING TOPICS ON LEADERSHIP & INNOVATION 2020

5-day Immersive Program in Washington D.C.
Experiential learning is being able to demonstrate the intentionality in the way a student approaches the experience, how they learn by meeting objectives, document, describe what they would do different next time, and formally work through all the processes they are presented — this is what employers and others are looking for.

Innovation leadership is a philosophy and technique that combines different leadership styles to influence employees to produce creative ideas, products, and services.

What Leaders Need Now Is Innovation Leadership. They need it for themselves as they learn to operate in challenging, unpredictable circumstances. They also need to create a climate for innovation within organizations. Innovative systems, tools, and thinking are essential for organizational health and future viability.

Continuing Education Center is proud to offer an Experiential Learning Program in Washington DC covering Innovation Leadership.
